

WEARABLES INDEX FACT SHEET

as of 3/31/17

A benchmark to track global companies that have a current or future business focus on wearable technology products and/or components.

The Case for Wearables

Wearable technology devices are mobile electronics that can be worn on a user's body or attached to clothing for application categories such as: Sports and Fitness, Industrial/Military, Infotainment/Lifestyle, and/or Healthcare and Medical. Examples of wearables devices include: activity trackers, smart watches, smart glass, body cameras, health monitors, virtual reality headsets, hearables, and wearable industrial computers.

- 1. Growing Global Opportunity** - According to International Data Corporation (IDC), the worldwide wearable device market is expected to reach a total of 111.1 million units shipped in 2016, for an annual gain of 44.4% over 2015. By 2019, total shipments are expected to reach 214.6 million units, resulting in a five-year compound annual growth rate (CAGR) of 28%.¹
- 2. Gateway to the Internet of Things** -Wearable devices seamlessly integrate computer and monitoring functionality into our daily lives. Wearables provide quick and easy access to reliable and immediate information, empowering the wearer and acting as a "gateway" to the connected world and Internet of Things.
- 3. Expanded Use Case** - Whereas wearable devices such as smart watches and activity trackers lead the consumer category, the use cases for wearables continues to expand for business, healthcare, government, and military. According to Forrester Research, 76% of global tech and business leaders have wearables on their agenda as a tool to harness data and enhance customer interaction.²
- 4. Untethered Potential** - As wearable devices "untether" from smart phones and can serve as stand-alone devices, their potential uses will expand, serving as "free agents" in the Internet of Things.

Constituent Requirements

In order to be eligible for inclusion in the index, companies must meet the following conditions:

- Derives revenue from the sale of wearable technology devices for applications such as: Sports and Fitness, Industrial/Military, Infotainment/Lifestyle, and/or Healthcare and Medical OR derives revenue from the manufacturing of components used in wearable devices such as semiconductors, sensors, and displays.
- In order to be considered for inclusion in the Core Wearable investment pool, significant revenues (as defined by EQM Indexes, the Index Provider) should be derived from the sale of wearable devices.
- Companies deriving only minimal revenue (as defined by EQM Indexes, the Index Provider) from the sale of wearable devices and/or who are primarily engaged in the manufacture of wearable components such as semiconductors, sensors, or displays will be considered for inclusion in the Non-Core Wearable investment pool.
- Listing on a regulated stock exchange in the form of shares tradable for foreign investors without restrictions.
- Market capitalization of at least 300 million USD.
- Minimum price at time of purchase of \$5 per share USD.
- Average daily traded value of at least 2,000,000 USD over the last six months.
- Adequate constituent liquidity and accessibility for an exchange listed product as determined by the Index Provider, EQM Indexes.
- Non-US companies will be U.S. exchange traded ADR versions if available, assuming they meet liquidity requirements, otherwise local shares will be utilized that meet the listing requirements and meet the continuing analysis of liquidity.
- No local shares, only ADRs, will be held for companies domiciled in Emerging Market countries or those listed on small regional exchanges.
