

# History of Blockchain

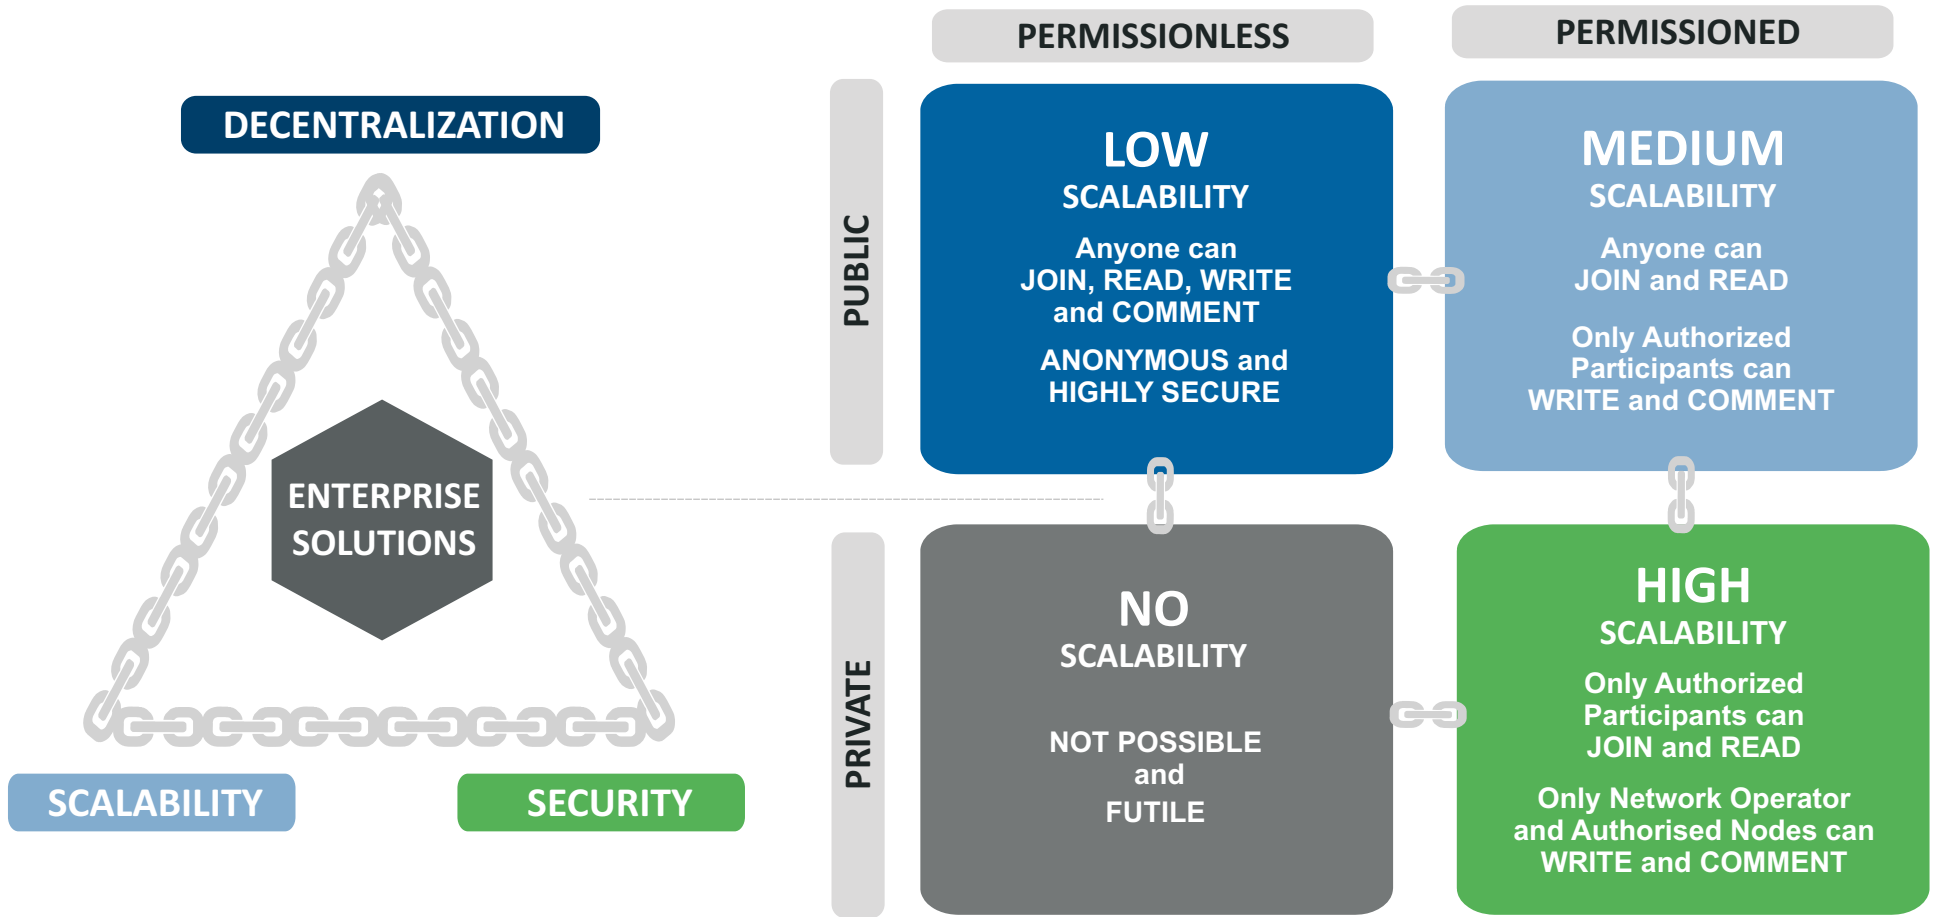

## Major Milestones

# The Rapid Innovation of Blockchain

For enterprise use-cases, a permissioned and private network is usually the best fit.

# Blockchain Industry Disruption is Just Starting

Although still in its nascent stage, blockchain is a foundational technology with the potential to disrupt many different industries over the next five to ten years.

## Top Industries to Benefit from Transparent Distributed Ledger Technology

### BANKING / PAYMENTS

Access to financial services for billions of people around the world through democratized banking.

### CYBER SECURITY

Advanced encryption techniques allow for data that is less prone to attacks or unauthorized changes.

### SUPPLY CHAIN

Easier logistics management with better tracking of items thru production to shipping and delivery.

### INTERNET OF THINGS

A decentralized network will provide improved device communication in order to update, manage and monitor.

### INSURANCE

Smart contracts integrate real-world data requiring less auditing and lower premium costs.

### CHARITY

Donations can be tracked so that donors are assured that they are received by intended recipients.

### FOOD SAFETY

Food products can quickly be traced to their source to better contain disease or contamination.

### VOTING

Fair and accurate results can be assured in elections addressing voter fraud and ensure proper counting.

### HEALTHCARE

Secure platform access will provide, store and share medical records for better diagnosis and/or research.

### ENERGY

Energy sharing enabled through a decentralized peer-to-peer network of transactions.

### MEDIA

Protected ownership rights and royalties. Artist can be paid directly for content without publishers.

### RETAIL

Direct purchases between buyers and sellers through smart contracts and secure payments.

### REAL ESTATE

Enhanced transaction speeds, along with accuracy of tracking /verifying ownership and transferring assets.

### GOVERNMENT

Transparency increased to reduce inefficiencies and corruption, plus better management of public benefits.

### HUMAN RESOURCES

Greater record accuracy for efficient background checks, employment history and academic credentials.
