

ONLINE RETAIL INDEX FACT SHEET

as of 6/30/22

A benchmark to track global companies that derive significant revenue from online retail, online marketplace, and online travel.

The Case for Online Retail

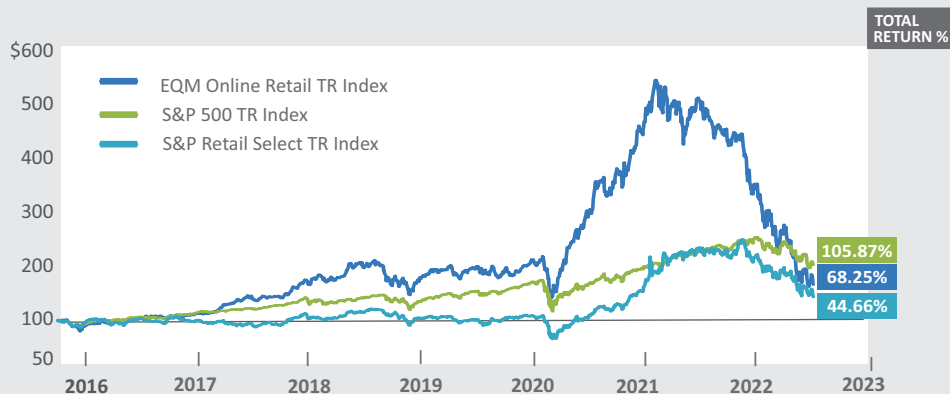

Online retail is the fastest growing segment of retail sales. Competitive pricing, shopping convenience, greater product selection, and rapid delivery have made online retail a disruptive technology that appears here to stay.

- 1. Growing Global Opportunity** - While growth has slowed for the traditional brick and mortar retailers, online retail continues to exhibit strong growth characteristics, gain market share, and expand globally.
- 2. Expanding Internet and Mobile Penetration** - While more than 60% of the globe currently has access to the Internet, that opportunity set is rapidly growing thanks to smart mobile devices which enable consumers to shop anywhere and anytime online.
- 3. Technological Advancement** - Future technological innovations such as seamless and secure methods of electronic payment, voice assisted shopping, virtual and augmented reality, and artificial intelligence informed personalization, will take the online shopping experience to the next level and further drive market expansion and growth.

Past performance is not an indication of future returns. The performance herein is provided for illustrative purposes only. The index returns shown do not represent the actual trading results of any investment account. The Index returns include the reinvestment of dividends and do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the Index, or investment funds that are intended to track the performance of the Index, the imposition of which would cause the returns to be lower than the performance shown. The S&P Retail Select Index is an unmanaged index that tracks retail companies. Please see additional disclosures at the end of this fact sheet.

Overview

The EQM Online Retail Index seeks to track the combined performance of a basket of global stocks that derive significant revenue from online and virtual retail commerce including the online retail, online marketplace, and online travel market segments. The index is equal-weighted with a maximum of 25% of exposure to non-US stocks. ADR's will be utilized for non-US holdings where available provided they meet liquidity requirements.
