

# NATURAL RESOURCES DIVIDEND INCOME INDEX

as of 9/30/22

An index designed to generate income from dividends, special dividends, and share repurchases derived from global equity positions in natural resource and commodity-related industries.

## The Case for Natural Resources Dividend Income

In the current inflationary environment of high energy and commodity prices, natural resource and commodity-related equity companies are in the “golden age” of free cash flow. Because these companies are not spending money on new capacity, balance sheets are becoming debt free, and free cash flow is being returned to shareholders in the form of 1) increasing fixed dividends, 2) high variable or special dividends, and 3) share repurchases.

- 1. Cash Flow Monsters** – Thanks to rising energy and commodity prices, natural resource and commodity-related companies are generating excessive amounts of free cash flow that are not going to be invested in capacity expansion and/or capex, but rather used to pay down debt or returned to shareholders in the form of dividends and shareholder yield.
- 2. A Play on the Energy Transition** – The diversified index is composed of companies operating in “Old Energy” and “New Energy”; providing exposure to both legacy fossil fuel companies and companies producing the new critical commodities and materials essential for an energy transition to clean energy.
- 3. Commodity Income Supercycle** – Pandemic-related supply-chain constraints, the Russian-Ukraine war, and accelerating demand for green energy commodities, coupled with years of under-investment, have spurred a commodity income supercycle. High energy and commodity prices appear here to stay for many years to come, creating an income opportunity for investors.
- 4. Global Income Tied to Inflation, but Not Subject to Foreign Tax Withholding** – By investing in U.S.-traded ADR or OTC-listed share versions of global natural resource, commodity-related companies, investors can receive inflation-aligned income, not subject to foreign tax withholding.

## Overview

The EQM Natural Resources Dividend Income Index (NDIVITR) is a Gross Total Return index comprised of dividend-paying U.S. exchange-listed equities operating primarily in the following natural resource, commodity-related industries: energy (oil, gas & consumable fuels); chemicals; agriculture; precious and industrial metals & mining; paper products; and timber.

Index components are weighted according to their indicated dividend yield. To avoid undue concentration, the initial weights of all index constituents are capped at a maximum weight of 5% at time of rebalance.

<b>Ticker</b>	NDIVITR
<b>Inception Date</b>	8/1/22
<b>Index Calculation/ Publication</b>	BITA GmbH
<b>Total # Holdings</b>	48
<b>Dividend Yield</b>	10.26%
<b>Rebalance (Jan/Apr/Jul/Oct)</b>	Quarterly

## Constituent Requirements

The initial Universe is composed of U.S.-listed equities trading on a major U.S. exchange or as an U.S. OTC-listed ADR that pay a dividend.

The final eligible universe is constructed after the application of the following screens and filters:

- Constituent business operations must derive more than 50% of their revenues from the following natural resource, commodity-related industries: energy (oil, gas & consumable fuels); chemicals; agriculture; precious and industrial metals & mining; paper products; and timber.
- Constituents must be at least \$5 billion USD in market capitalization.
- Constituents must have an average daily traded value of at least \$2 million USD over the last six months.
- Constituents must have an indicated dividend yield of at least 3% annually.
- Country of domicile not Russia and/or the security must be eligible for investment without restriction as determined by the index provider.
